

Position Description

Mechanical Engineering Technician

Duties / Responsibilities

- Drafting mechanical systems for commercial buildings including:
 - Heating, Ventilation and Air Conditioning
 - Plumbing
 - Fire Sprinkler
- Measurement and documentation of existing systems in buildings planned for remodel.
- Coordinating with other professional members of the design team.
- Contributing to the improvement of AutoCAD guidelines and methods to increase quality and efficiency of documents.
- Increasing knowledge and participation in design of mechanical systems under the supervision of senior design technicians and professional engineers.

Requirements

- Completed an Associate's Degree of Drafting or Bachelor's Degree of Science.
- Proficient in AutoCAD and Microsoft Office software.
- Experience with Revit software is preferred, but not required. Training will be provided so that the technician can become proficient in Revit if they are not already proficient.
- Must have a professional and pleasant attitude.
- Must be comfortable working independently, but also working collaboratively with other professionals.

Compensation and Benefits

- Work hours are 40 hours per week with overtime available several times during the year.
- Hourly pay to be determined based on experience.
- Benefits include health, dental, vision, disability and life insurance; HSA; paid time off (PTO) and holidays; 401K plan with profit sharing; and cell phone reimbursement.
